Action for Libraries — July 2001

NetLibrary Creates TitleSelect Service

NetLibrary's extensive electronic books catalog of more than 35,000 copyrighted titles just got easier to search thanks to TitleSelect, a new interactive online catalog that facilitates selection of titles, collections and order placement by acquisitions and collections librarians. Users can now search by author, title, publisher, subject, keyword, netLibrary ISBN, print ISBN, e-book ID and publication date. Librarians can use TitleSelect to customize existing netLibrary collections to meet their specific library's needs. Users can download or e-mail a list to colleagues for review and then place an order with netLibrary online. TitleSelect also allows online tracing of order status.

Current BCR netLibrary users can access TitleSelect through their library's extranet. Non-customers can access TitleSelect through www.netLibrary.com. For more information, contact BCR's Jim Hensinger at jhensing@bcr.org.
