

BCR Certifies CD-ROM Lock Y2K Compliant

By James Speed Hensinger

After rigorous analysis, BCR has found the BCR CD-ROM lock to be Year 2000 compliant. Although the lock is named the BCR CD-ROM lock, it also has been used to successfully secure floppy drives, reset buttons, computer power switches, cash drawers and laser printer power switches. Creative librarians may find even more uses for the lock.

For more information, surf to BCR's web site www.bcr.org and click on CD-ROMs or call Laura Chittivej at BCR. Check out BCR's Y2K web page at www.bcr.org/~ids/Toolkits/year2k.html.
